

THE DANVILLE VILLAGE TO VILLAGE PROJECT

Making safe connections to where we live, work and play

PLEASE JOIN US!

**Public Informational Meeting: Peacham Road
Advisory Shoulders**

Sunday, April 26th, 2:00 to 4:00pm

Danville Town Hall

The Village to Village project was a 14-month planning process that resulted in an Activity Center Master Plan for Danville with a focus on the Lamoille Valley Rail Trail. A thorough analysis identified Peacham Road as an important bike and pedestrian connection between the Village, the LVRT and the Town Recreation Fields. To improve safety, the Town has the opportunity to test and evaluate painted advisory shoulders along this corridor during the summer of 2020. Advisory shoulders act as a traffic calming mechanism and improve safety by providing a designated lane for bicyclists and pedestrians along the roadway. Please Join us on April 26th to learn more.
